IMAGING FACILITY - BOLOGNA

STELLARIS spectral confocal platform with multiplexing and lifetime capabilities

AGENDA

Group 1

10:00 – 10:15 Welcome. *Spartaco Santi*

10:15 – 10:45 System presentation. *Corrado Dallacosta*

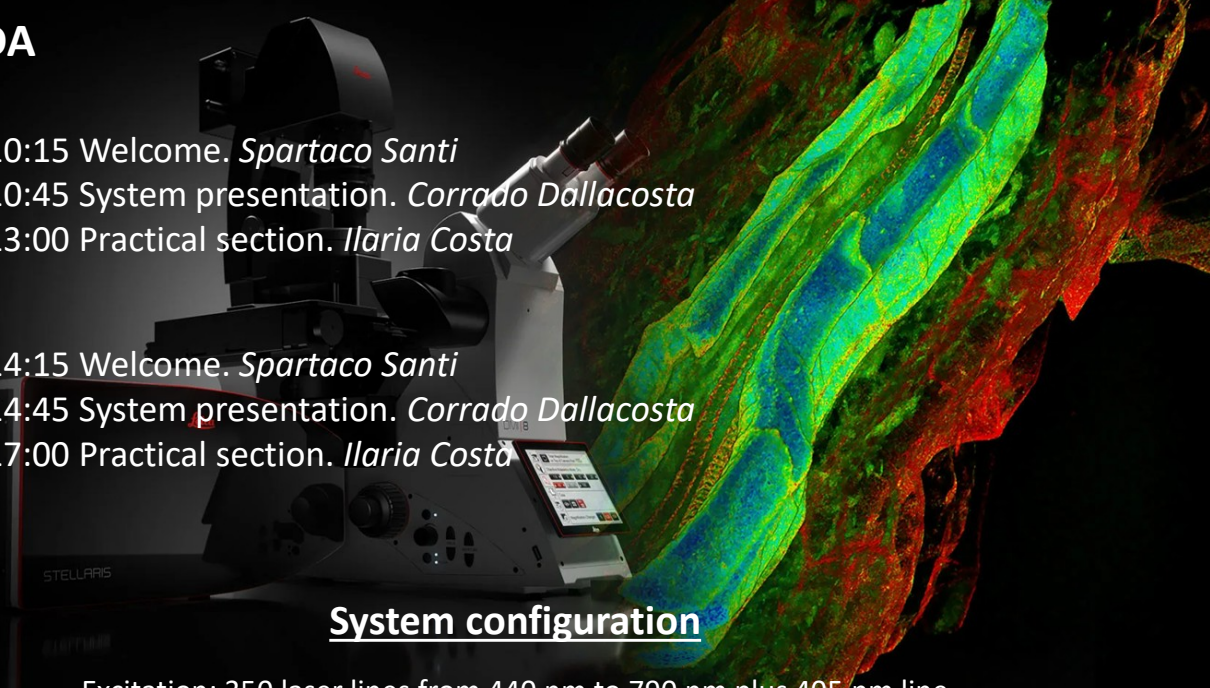

11:00 – 13:00 Practical section. *Ilaria Costa*

Group 2

14:00 – 14:15 Welcome. *Spartaco Santi*

14:15 – 14:45 System presentation. *Corrado Dallacosta*

15:00 – 17:00 Practical section. *Ilaria Costa*

System configuration

Excitation: 350 laser lines from 440 nm to 790 nm plus 405 nm line.

Detection: Full spectrality from 410 nm to 850 nm

* *FEEL FREE TO CHOSE WHATEVER FLUOROPHORE* *

FLIM: Lifetime capabilities with all 440-790 nm laser lines

Lightning superresolution

From Tuesday 12 May 2026

Digital Microscopy Center

c/o Centro di ricerca Codivilla Putti - Via di Barbiano 1/10
Bologna

Reserve your slot and bring your sample!

Send an e-mail to the contacts below to reserve your slot.
If you will bring samples please provide a short description
